DATE OF
25X1 INFO.

SUPPLEMENT TO
REPORT NO.

25X1

1. The Warnow-Werft (Warnow Shipyard) in Warnemuende was ordered by the Main Administration at the Ministry of Mechanical Engineering (sic)¹, to complete the SOVIETSKY SOUTZ 100 percent, the YURY DOLGORUKI 78.5 percent and the ADMIRAL NAKHIMOV 76.5 percent in 1953. ²
2. Six river passenger ships for the U.S.S.R. were scheduled to be built in 1953. They were to be light-draft ships about 100 meters long. ³ Two river passenger ships which had been laid on the stocks in early 1953 were removed from the building slips in early February 1953 because of the shortage of materials. The 1953 building program also included the construction of a floating dock capable of accommodating ships of up to 23,000 displacement tons, and preparatory work including calculation, calculation of material required, and design for an ore-and coal carrier.

25X1 1. [] Comment: HV Schiffbau was transferred to the Ministry of Transportation and Agricultural Machine Construction in January 1953. It had formerly been under the jurisdiction of the Ministry of Machine Construction.

25X1 2. Comment. The three ships under repair were 35 percent completed in late 1952.

25X1 3. Comment. The river passenger ships probably were sister ships of those under construction at the shipyard in Wismar.
